WEST LA FAYETTE. IND.

## TERMS OF SALE

---

### Please Read Carefully Before Ordering

**Guarantee:** We believe our stock true to name; every effort is made to avoid mixtures and prevent mistakes. Should an error occur we will be glad to adjust the matter if notified promptly on first blooming.

**Quality:** All former prices are cancelled. Prices are based on strong single divisions. We always send out the best blooming size roots we have. It should be noted, however, that while we firmly believe in early summer planting the rhizomes are not as large in July as in September. Some varieties never develop large rhizomes. We guarantee to satisfy. Let us know if any item should prove unsatisfactory. We will make it right.

**Delivery:** We begin to fill orders about July 20th, after that date orders will be filled in rotation as received unless a special date is specified. We send all retail orders **prepaid**, but do not ask us to accept orders for less than \$1.00. Large quantities are shipped by express, others by parcel post.

**Terms:** Cash with order, please.

**Quantity Offers:** See inside back cover page for special quantity offer. On other varieties when quantity of stock permits we will furnish 12 for the price of 10, 6 or 3 at the same rate.

**Discounts:** There is no discount on collections, seedlings or quantity offers. A cash discount as indicated below will be allowed on orders for single plants or in lots of 3, 6 or 12 at the dozen rate, amounting to

\$10 or over-----	5%
\$25 or over-----	10%
\$50 or over-----	15%

Except that no discount can be applied on varieties priced \$5.00 or over. We already have these as low as the availability of stock will justify.

**Special Note:** The customer must indicate in the order that he is taking advantage of quantity prices or applying discount. If this is not done we will not feel obligated to adjust the charges for him.

Mixed seedlings at \$5.00 per 100, carriage collect. See page 8.

Named varieties for landscaping at \$8.50 to \$12.50 per 100. If larger quantities are desired for landscaping, write for special quotations.

## AN ACKNOWLEDGMENT AND AN INTRODUCTION

First, I wish to express my appreciation to my many customers, not merely for their generous orders, but especially for the many letters of commendation which have been received on the quality of my stock and for the generous way they have assisted by furnishing the names and addresses of flower loving friends. One of the greatest pleasures of the flower specialty business is in the pleasant association with interesting people. I wish that I might meet all my customers personally and exchange experiences.

Those who have not yet made the acquaintance of Iris Fields in a business way should know that only Iris are raised for sale. I specialize in this one flower, propagating from the surplus stock of my personal collection. This collection at present contains about 550 varieties and species and is one of the best selected (not the largest) in the middle west.

The business conducted under the name of Iris Fields is the outgrowth of a hobby. The collection was founded primarily for the purpose of study and breeding. Most of the French and English novelties have been imported directly from the introducers. The greatest of care is exercised to make certain that varieties are true to name. When a variety first blooms it is carefully checked with the description of the introducer and the official description, published by the American Iris Society. A special comparative study of varieties is being made and I am always glad to give Iris lovers the benefit of this study.

What does this mean to the buyer of Iris? It means that you can depend on getting true to name stock. You also have the benefit of mature, expert scientific judgment. (I am a botanist by profession.) It means that you are dealing with a fellow gardener, a kindred spirit, who is just as anxious to find out what are the finest varieties among the novelties as you are, and who, because of the opportunity to observe among a collection of 550 varieties, can give you valuable aid. I am always glad to advise at any time and give my best judgment on the finest in any color group or type. It is my policy also to tell the truth as I see it with reference to varieties. Another thing that is important to you: Since I grow only Iris, personal supervision is given to planting, transplanting and to filling orders. This greatly reduces the chance for error and insures that customers receive the best and strongest divisions available at any date. I fully realize that my success depends on being able to satisfy, and I will not send out any roots that I would not be satisfied to receive. My standard is high. It is my aim to offer for sale only the worth while varieties.

## THE IRIS AS AN IDEAL GARDEN PLANT

---

The Iris is justly called the "Queen" of the Perennial Garden. No other perennial plant available to our gardens combines so many good qualities. They are inexpensive, extremely hardy, may be grown under a great variety of conditions, require a minimum of care, suffer from few diseases and insect pests, and exist in an array of colors rivaled only by the Gladiolus. It is largely for these reasons that the Iris has in recent years grown in popularity until at the present time it is perhaps the most popular of all perennials. Not the least reason for this popularity, however, is the great advance which has been made in breeding. During the past fifteen years breeders in England, France, and America have given us many varieties which greatly surpass all but two or three of the older varieties and the end is not in sight. Every year novelties are being introduced in large numbers, many of which are improvements over those already existing.

In the garden of the busy man or woman there is little place for plants which require undue care or coddling. This is particularly true of the garden on the farm where more important activities take the time and energy of those who would need to do the necessary work. The Iris is therefore peculiarly adapted to the farm garden and for use in landscape work on the farm.

Many people in our towns and cities still rent the homes in which they live and on this account hesitate to grow perennials and either grow annuals or no flowers at all, even though they may be flower lovers. There is no reason, however, why such people should not grow Iris. There is no other perennial that I know which can be moved successfully at practically any season of the year when the ground is not frozen. The renter, therefore, may enjoy the beauties of the Iris and take them with him when he moves.

Iris are adapted to a wide variety of uses in the garden. They may be used in groups in the perennial border, as isolated clumps in front of shrubbery, or massed in effective color groups in a great variety of positions. They may be used as borders for walks or driveways, or planted formally in beds. A little study will enable one to combine the colors in very effective groupings. One might think that in mixed plantings you would have color clashes, but this is not so. They are very effective in mixed plantings. In some cases, however, the true quality of some variety is nullified by planting too close to another of different type.

**Good drainage and plenty of sun are essential.**

### A WORD ABOUT PLANTS AND PRICES

Our prices are based on strong single divisions. We always send out the best divisions available and save the smaller ones for our own propagating. It should be understood that while we strongly recommend planting in July and early August, the divisions are not as large at the earlier dates as they are in the fall. However, it is to the advantage of the customer to obtain this additional growth in his own garden rather than in ours. It should also be recognized that varieties differ in the size of the divisions. Some kinds never develop large rhizomes.

Why are some varieties so much higher priced than others? All named varieties have originated from a single seed. If the variety was originated 20 years ago it is obvious that there are now hundreds of thousands of plants available and the price is low. If, however, the variety was introduced in 1923 or 1924 the total number of plants available may be very small. Some prices remain high because the variety was introduced at a very high price, or it may be slow in growth, or in great demand. We believe our customers will find that our prices compare favorably with those of any other specialist.

### THE CULTURE OF TALL BEARDED IRIS

There is no plant among our garden perennials that is of easier culture than the tall bearded Iris. They may be grown under a great variety of conditions, but for the best results they should be planted in a sunny well drained location and in a medium rich, mellow soil.

While they do best in full sun, it is often impossible to provide such a location for all that you may wish to plant. They will do very well in a location shaded during a part of the morning or afternoon, but in general they should have the noon-day sun if possible. They should never be planted in full shade or on the north side of a building. They may be planted on the east or west side of a house provided they receive the full early morning or late afternoon sun and are not planted too close to the foundation.

If Iris must be planted on heavy clay soil, particularly if the ground is level, it is well to plant in raised beds to insure good drainage. Some tender varieties such as San Gabriel, Mme. Durrand, especially those of Riccardi parentage develop strong vegetative growth in the fall and are likely to be injured during the winter. It is, however, not so much low temperature as the effect of water and ice, which is responsible for this injury. Any method of protection which keeps off the late fall and winter rains will enable one to grow these varieties to perfection.

Use lime if the soil is sour.

Iris will do well in a great variety of soil. We have seen beautiful clumps on the edge of a gravel bank and have grown them to perfection in a location where gravel was close to the surface. The ideal soil, however, is a reasonably rich garden loam. If the soil is too sandy clay can be added, or if too stiff add humus or sand. One of the most important requirements is good drainage. They should never be planted where water stands for any length of time.

Iris may be transplanted at any time when the ground is not frozen. This is particularly true when they are to be moved from one part of the garden to another. The most ideal time to plant Iris, however, is in July and August. New roots are starting during this period and they become well rooted and anchored before freezing weather. If Iris are set later than the middle of September it is important that they be mulched as soon as the ground freezes with some coarse material which will tend to keep the ground frozen and thus prevent heaving, which is likely to occur in regions where alternate periods of freezing and thawing weather are frequent.

Iris should be planted shallow. The character of the soil will determine the depth. In heavy soils they should be planted with the top of the rhizome showing above the soil. In light soils they may be planted with one-half to one and a half inches of soil over the rhizome. Spread the feeding roots as much as possible and press the soil firmly over the roots and around the rhizome so as to leave no air space. If the soil is dry, water thoroughly when planting, but do not over-water. Remember that too much water, not drouth, is the danger with bearded Iris. We do not hesitate, however, to water Iris during prolonged periods of drouth during the summer. This should be a thorough soaking, not a surface sprinkling.

Iris will do well with little cultivation. Enough to keep down the weeds and produce a dust mulch is often sufficient. However, because they are so adaptable they are often neglected and looked upon as something to fill a difficult spot in the garden and frequently do not receive the attention they deserve. Iris will amply repay one for good and proper cultivation. In any case, cultivation should be shallow as the feeding roots of Iris are wide spreading and close to the surface.

For best bloom clumps of Iris should be divided every 3 to 6 years, depending on the variety.

Bearded Iris require a sweet soil. Applications of hydrated lime or finely ground limestone in small quantities is often a benefit. Bone meal seems to be a safe fertilizer and, if applied early in the spring, a light dressing of a complete fertilizer may be helpful. Nitrogen should be

Plant in a sunny well drained location.

used sparingly, if at all, as this tends to over vegetative growth and consequent danger of the rhizomes being immature when winter sets in, resulting in freezing injury.

Beardless Iris do not like an excess of lime. They will do well in moist locations but, except for *Iris pseudacorus*, *I. versicolor* and some others, should not be planted where water stands.

### DISEASES AND PESTS

Iris are quite free from serious diseases or insect pests. There are, however, a few that should be mentioned as they are likely to occur wherever Iris are grown.

**Root Rot:** The most common and serious disease is known as root rot. This is caused by a species of bacterium known as *Bacillus carotovorus*. Bacteria of this group are common rots of vegetables and other plants and the organisms may be present in any garden soil. If rot is found to develop uniformly year after year in a planting of mixed varieties it is probable that the conditions in that spot are not right. Study these conditions and correct where possible or move the plants to a new location. If rot develops occasionally on scattered plants, then it is best to leave the plants where they are and scrape out the rotted portion and treat the exposed surface and the soil about the rhizomes with powdered gypsum or gypsum mixed with equal parts of finely powdered sulphur. Rot is more likely to develop in the less well drained spots in the garden and is more abundant in wet seasons. Rot often starts in wet weather on the old bloom stocks. If these are cut close to the ground, soon after blooming, much trouble from this source may be avoided.

**Leaf Spot:** A number of parasitic fungi have been described as causing a leaf spot on Iris. The most common of these is *Didymellina iridis*. This leaf spot can usually be held in check by thoroughly cleaning out and burning all old foliage and other litter from about the crowns early in the season before new growth starts.

**Sclerotium Disease:** This disease is caused by a fungus related to or identical with *Sclerotium Rolfsii* sometimes referred to as the "mustard seed fungus." This fungus attacks the bases of the leaves, rotting them off slowly, and is often accompanied by the development of considerable white mycelium (mould) on the surface of the ground about infected plants and on the surface of the rhizome. On this mycelium are usually formed large numbers of very small brown sclerotia about the size of mustard seed. It is possible that this fungus is in part responsible for a rhizome rot which reduces the tissue within the old rhizome to a reddish brown fluid. The disease is readily controlled by liberal applications of powdered gypsum about the crowns of the plants. Powdered sulphur is also good.

**Root Borer:** The most serious insect pest of Iris is the root borer. The adult of this insect is a nocturnal moth which emerges and lays eggs in folds on Iris leaves late in the fall. These eggs hatch the following spring and the larvae enter the developing foliage and gradually work down into the rhizome and finally pupate in the soil beneath the affected plant. Unfortunately there is no positive remedy for this pest. The following recommendations will, however, tend to hold it in check. In the early spring before growth starts, clean out all the old foliage and other litter about the plants and burn it at once. As the foliage begins to develop vigorously in the spring watch for evidences of the work of the young borers and cut off the foliage below the point of attack and burn it. When replanting watch for borers and destroy the infested foliage or dig out the young borers. It is possible that spraying in the early spring with arsenate of lead and fish oil soap will control this insect. An exact method has, however, not yet been worked out.

### IRISES FOR THE BEGINNER

What Iris should the beginner buy? This depends on conditions. If considerable space is available the beginner should first acquire a collection of the standard inexpensive sorts, and then weed out the ones that do not appeal and replace with other varieties. It should be recognized that there are many of these that are very good and will be slow to be replaced by the novelties. The rating of the American Iris Society is a good guide to the best among the old standards. Most of the poor ones were rated very low and by selecting varieties in general that rate above 70 no one will make any serious mistake.

If, however, one has space for only a very limited number, say a dozen, then the best is none too good and the planting should be made from such varieties as Lent A. Williamson, Queen Caterina, Souv. de Mme. Gaudichau, Ambassadeur, Ballerine, Magnifica, Mother of Pearl, Asia, Lord of June, Prospero, Susan Bliss, Dream, White Queen, Shekinah, Seminole, Crusader, etc., which are among the finest in cultivation. All of these except Asia and Susan Bliss can be purchased for \$1.50 or less at the present time. The only ones among the standard varieties which can compete with them are Princess Beatrice, Isoline, Alcazar, Edouard Michel, Afterglow and Iris King.

Of course, there are many other fine varieties especially among the new and more expensive sorts. Some of these will eventually replace most of the standard varieties. Among the very finest of these which eventually should be in every collection are Aphrodite, Bruno, Morning Splendor, Cardinal, Swazii, Vesper Gold, Pioneer, Tenebrae, Tropic Seas and many others.

### COLLECTIONS

Largely for the benefit of the beginner in Iris growing we are offering special collections and combinations. These will be found on page

31. Since a number of collections can be dug at the same time it is possible to offer them at reduced prices.

We can recommend these collections without hesitation as our planting of the standard varieties includes only a selection of the better sorts. We do not have any varieties in our gardens that are on the American Iris Society's black list and very few that rate less than 75.

#### SEEDLINGS

As with most Iris enthusiasts we are growing many seedlings. It is our policy to plant seed only from crosses between the finest varieties. From those which have bloomed about 50 have been reserved for further observation. The others, which include many very fine things, must be disposed of in order to make room for the thousands of young seedlings which are coming on, many of which should bloom for the first time in 1928.

We are offering these surplus seedlings at \$5.00 per hundred divisions, express charges collect. These are all from plants which have bloomed and a large majority should bloom again next year. They will be mixed and while we cannot guarantee it, every effort will be made to include at least 50 different kinds. These include many sorts that are superior to most of the old standard varieties and will make a very fine mixed landscape planting. They will also be valuable to those who grow Iris for cut flowers. In many sections Iris can be depended on for Decoration Day.

We are introducing for the first time this year a seedling from our gardens. This is our No. 21 which has been named Golden Glory (see page 16). It is a bright clear yellow which we believe to be superior to Shekinah. This Iris received an award of Honorable Mention by the American Iris Society at the Lafayette show in June, 1926. At this same show Iris from our garden took sweepstakes and a bronze medal offered by the American Iris Society. At the 1927 Lafayette show we again took the sweepstakes in the professional classes. These are the only exhibits in which our flowers have been entered in competition.

#### AMERICAN IRIS SOCIETY

Every one interested in Iris, even in a small way, should affiliate themselves with the National Society. This organization, known as the American Iris Society, was established in 1921, and has done much to develop interest in the Iris through the publication of bulletins, a check list of varieties, fostering shows at various places and establishing test gardens. The Society has issued twenty-three bulletins to date and plans to issue four each year which are sent free to members. These bulletins as a whole form an excellent library of information on Iris varieties, culture, breeding and breeders, etc. An investment of \$3.00, the annual dues, will be amply returned in benefits received. Send dues to the Secretary, Mr. John B. Wallace, Jr., 129 Church St., New Haven, Conn.

Clean up and burn old Iris foliage in spring

## DESCRIPTION OF VARIETIES

The figure before the name is the rating of the American Iris Society on a score of 100 as perfection. Those not preceded by a figure have not yet been rated. Any Iris receiving a score of 70 or over is considered good. In the description, S. stands for the standards, the three upper petals of the flower, and F. for the falls or three lower petals. The term "self" refers to a flower of one color in both standards and falls.

83	AFTERCLOW (Sturt. 1917). Grayish lavender blend, suffused with yellow through center, 3-4 ft. A variety that appeals to the discriminating. It is best seen at sunset when the origin of the name becomes evident -----	.35
79	—ALBERT VICTOR. A rich blue self colored variety. One of the best of the Standard sorts. Free blooming and vigorous-----\$ .25	
89	—ALCAZAR (Vilm. 1910). A very large vigorous bicolor. S. slaty bluish violet; F. deep reddish purple. We consider this the equal of Lent A. Williamson and one of the three best of the older varieties -----	.35
78	—AMAS. Very large blue and rich purple bicolor. One of the parents of Lent A. Williamson. Early and vigorous -----	.25
94	AMBASSADEUR (Vilm. 1920). We have no hesitancy in saying that this is the finest of the deep toned bicolors, and one of the five or six best Iris in cultivation. S. light smoky reddish violet; F. violet red, rich and velvety. Late-----	1.00
83	AMBIGU (Vilm. 1916). A free flowering vigorous variety that is much admired. S. smoky red or magenta; F. velvety reddish brown -----	.50
	ANGELO (Hort 1920). "A pale purple bicolor on the lines of Lady Foster. Strong straight stems bearing enormous flowers similar in shape to Lady Foster, but rather deeper in color. S. pale lavender blue; F. a deeper tone very long and broad. This is an exceedingly handsome plant and up to the same standard as Ann Page. 2½-3 ft." Introducer's description-----	2.00
77	ANNE LESLIE (Sturt. 1918). A dainty variety of pleasing color tone. S. white faintly rose flushed; F. dahlia carmine-----	.75
86	ANN PAGE (Hort 1919). A pale lavender blue self with large flowers of splendid shape and substance. We can recommend this variety without hesitation. 3 ft. -----	3.00
	ANOBA (Perry 1923). Described as a great improvement on Prosper Laugier and of practically identical coloring-----	2.00
	APHRODITE (Dykes 1922). A pure bright violet-pink self, the falls with a white flush from center of blade to haft. Growth vigorous, 3½ ft. Flowers of finished form and fine substance. We would rate this variety 93 and believe it one of the first dozen Iris in cultivation-----	10.00
	ARAGON (Bliss, 1921). S. bright golden yellow; F. bright velvety red-brown, heavily reticulated on a pale yellow ground, beard deep orange -----	1.00

We pay the postage on all retail orders.

83	ARCHEVEQUE (Vilm. 1911). An old variety that has not been surpassed in its color. S. deep purple violet; F. velvety raisin purple. 2 ft.	.35
	ARGENTINA (Mohr, 1924). This is the finest white we have seen. Gold veined at base of falls. Perfect in carriage, form and substance. 3 ft. or over. (Stock limited)	5.00
	ARGONAUT (Bliss, 1920). A clear light lavender violet self. Stalk well and widely branched. Free flowering and vigorous	.50
	ARGYNNIS (Wilms. 1925). A free blooming variety and the tallest in its color group. S. Strontian yellow narrowly margined and delicately shaded analine yellow; F. dark violet carmine, paling slightly at border, without the reticulations which mar so many of the varieties in this class. 40 inches	1.00
78	ARNOLS (Barr, 1874). An old favorite. S. rosy bronze; F. rich velvety purple. The best of the old dark bicolors	.35
84	ARSACE (Millet). An iridescent pink lavender of good form, 30 inches	.50
92	ASIA (Yeld, 1920). If we could have but one Iris it would be Asia. Large well formed flowers on well branched stems that may grow over 4 ft. S. broad, pale silvery lavender, deepening at base to golden yellow; F. light violet purple, paler at margin. A finished Iris	3.00
79	AUTOCRAT (Cleveland 1920). S. light lavender violet; F. darker blue. Vigorous to 3 ft.	1.00
80	AZURE (Bliss, 1918). A bright bicolor of clear intense coloring. S. lavender blue; F. broad rich violet blue. Very good	.35
94	BALLERINE (Vilm. 1920). We much prefer this to Lord of June. A really fine variety, and one of the best in cultivation. S. broad and wavy at margin, light blue violet; F. a tone darker. Large flowers on well branched stems, 4 ft. high	1.00
80	BARONET (Sturt. 1920). A distinctive blue toned Iris of Caterina parentage. F. slightly darker than S. Well formed and finished flowers on 40 in. stalks. We can recommend this variety without hesitation	.75
79	BARTON HARRINGTON (Fryer, 1919). This variety stands out as above the average in its class. S. bright clear golden yellow; F. rich velvety brown with a reddish tone	.50
	BATULUS (Perry, 1923). Tall branching stems, large well shaped flowers, S. bright purple rose; F. rose crimson, white lined at base	1.00
	BELISAIRO (Cayeux 1924). S. soft tan; F. light mulberry-purple. A large well shaped flower of Isoline type on tall, strong stems. Considered by many one of the best new French introductions	10.00

Cultivate shallow; roots are close to surface

	<b>BELLADONNA</b> (Koehler 1922). S. deep purplish blue, heavily mottled and striped on white. F. brighter than Standards. Distinct and showy -----	1.00
79	<b>BEN BOW</b> (Bliss, 1917). A deep violet blue self. Large flowers on tall well developed stems, 3 ft.-----	.50
83	<b>BLUE BIRD</b> (Bliss 1919). A Bradley's violet self. Vigorous well branched to 30 in.-----	1.00
72	<b>BLUET</b> (Sturt. 1918). A Cengialti seedling of an appealing blue tone. An addition to any collection-----	.50
91	<b>BRANDYWINE</b> (Farr 1920). A light hyssop violet self. Beard conspicuous, red orange. Stalk low-branched, vigorous	1.50
	<b>BRUNO</b> (Bliss, 1922). A Dominion race seedling of exceptional merit. S. bronze, tinted and lightened with lavender shading to yellow at base; F. deep rich red purple of large size and velvety texture, 3 ft.-----	15.00
85	<b>B. Y. MORRISON</b> (Sturt. 1918). S. soft lavender; F. velvety purple with broad margin of lavender. A distinct and beautiful variety which we can recommend highly-----	1.00
79	<b>CAMELOT</b> (Bliss, 1918). A warm white with heavy lavender markings. A very good plicata, to 4 ft.-----	.50
	<b>CAPORAL</b> (Bliss 1920). A bright reddish violet self. Free flowering and vigorous, 3 ft. Fine for massing-----	.35
	<b>CARDINAL</b> (Bliss, 1922). We consider this the best of the Dominion race and would rate it 94. S. a distinctive shade of lavender, overlaid with rose, carried erect, and arching inward at the top; F. rich prune purple, very broad, rounded and of wonderful glossy texture, 3 ft.-----	20.00
75	<b>CAPRICE</b> (Vilm. 1904). S. reddish mauve; F. slightly deeper rosy red. Grape juice odor. Fine for massing-----	.25
89	<b>CATERINA</b> (Foster 1909). A self of a delightful shade of soft lavender blue. Flowers large and well formed and of fine substance on tall well branched stems. One of the parents of some of our finest recent introductions-----	.50
	<b>CAVALIER</b> (Cleve. 1920). Considered by some an improvement on Azure. S. domed, clear blue; F. deep velvety blue purple. Extra good -----	.50
	<b>CECILE MINTURN</b> (Farr, 1922). One of the best light "pinks." Very free flowering and vigorous. Later than Georgia. A fine landscape variety-----	.75
71	<b>'CELESTE</b> (Lemon, 1855). An attractive celestial blue self. Old, but still valuable. Free and vigorous-----	.25
	<b>CHASSEUR</b> (Vilm. 1923). A very good tall yellow. S. and F. clear straw yellow; F. marked purplish red at base. Scarce-----	2.50
	<b>CHATELET</b> (Vilm. 1923). S. lavender, shaded pink; F. deep lilac pink reticulated white on blade, brown at base. Large flowers very freely produced. A new variety of merit-----	2.50

69	CHESTER J. HUNT (Farr, 1913). This variety was rated too low. We retain it because of its color. S. celestial blue; F. dark marine blue bordered pale blue. A free blooming variety valuable for massing -----	.25
86	CLUNY (Vilm. 1920). A magnificent tall growing variety with large flowers. S. pale lilac blue; F. a shade deeper. Highly recommended -----	.75
	COLIAS (Williamsn. 1925). A new free flowering light yellow self of promise -----	1.00
80	COLONEL CANDELOT (Millet, 1907). S. bronze overlaid reddish lavender; F. rich dark velvety crimson. A striking variety, vigorous and free flowering-----	.50
77	CORDON BLEU (Sturt. 1921). An unusually deep blue toned violet self with smooth spreading falls, of rich effect in the garden -----	.50
83	CORRIDA (Millet). A clear light bluish violet self of fine form. Free flowering and vigorous -----	.50
84	CRETONNE (Bliss, 1919). A strong grower with medium size flowers. S. pale bronze purple; F. rich maroon. Heavy orange beard. A very distinct and attractive variety-----	.50
87	CRUSAIDER (Foster, 1913). One of the finest lavender blue varieties, the falls being a deeper tone than the standards. A tall strong grower with very large flowers of good substance -----	.50
	DAINTY LADY (Weed. 1924). A distinct new variety of attractive coloring. S. buff; F. Chinese violet fading to lilac and shading to buff at margin, bright yellow beard. Somewhat like Ocracea in coloring, but better form-----	3.50
80	DALILA (Denis, 1914). A most distinct and striking variety with creamy yellow S. and plum red F. Vigorous and free flowering. We can recommend it highly-----	.50
75	DALMARIUS (G. & K. 1907). S. pale silvery grey; F. rosy lilac reticulated brown. A strong grower and free flowereing -----	.25
	DALMATICA. See PRINCESS BEATRICE.	
	DAMOZEL (Morr. 1922). "The large ruffled white standards and the flaring falls are bordered and misted with a delicate mauve." An extra fine plicata-----	2.50
	DANIEL LESUEUR (Denis 1913). S. cream spotted violet blue; F. same color tinted mauve at edge. Distinct and late-----	2.00
78	DAWN (Yeld, 1911). A free flowering variety with clear sulfur yellow flowers with orange beard-----	.35
	DEJAH (Perry 1923). A magnificent tall Iris, growing over 4½ ft. high. S. dark silver blue; F. bright mauve blue, bold yellow and white beard -----	2.50
83	DEJAZET (Vilm. 1914). A fine variety of distinct and unusual coloring. S. dusky rose-orange; F. clear reddish violet-----	.50

82	<b>DELICATISSIMA</b> (Millet, 1914). The general effect is a uniform soft shade of Cattleya rose. Distinct from Dream and fully as desirable. 3 ft.	1.00
	<b>DEUCALION</b> (Perry 1923). A distinct variety of a charming combination of colors. S. apricot, suffused rose; F. bright crimson purple; irregularly edged grey	2.50
	<b>DIADEM</b> (Bliss, 1919). A strong grower with stout stems 3 1/4 ft. high. S. pale mauve; F. deep reddish mauve, brilliant orange beard	.35
	<b>DIANTO</b> (Weed 1923). S. Cotenga purple; F. pansy violet. 34 inches. A small, floriferous variety of a reddish tone	.50
83	<b>DIMITY</b> (Bliss, 1919). S. white, slightly veined and pencilled mauve; F. wide, long and spreading, finely veined with lavender toward the upper half. Fine as a cut flower. A very distinct and strong growing variety	.50
	<b>DOLORES</b> (Bliss, 1920). A heavily margined plicata. S. broadly margined with reddish violet; F. narrowly edged with deeper color. Brown purple reticulations and spots on haft	1.00
91	<b>DOMINION</b> (Bliss, 1917). Perhaps the most famous of all Iris. An excellent breeder whose seedlings are among the finest novelties. S. Dauphin's blue or light bluish violet, large, erectly held, well developed; F. of exceptional substance, deep rich indigo purple. Very velvety texture. With us the plant has been vigorous but slow. The stalk is 2 1/2 ft. and not all that could be desired	10.00
78	<b>DORA LONGDON</b> (Bliss, 1918). A very rich colored variety with flowers of good shape. S. pale lavender suffused yellow; F. rich red lilac suffused at base and edge with yellow	.75
79	<b>DORMAN</b> (Bliss, 1920). S. reddish violet; F. red purple. Vigorous, 38 in.	.50
	<b>DOROTHEA K. WILLIAMSON</b> (Wlms. 1918). This is a beardless Iris originating in a cross between the native species <i>I. fulva</i> and <i>I. foliosa</i> . Generally considered one of the finest beardless Irises. Large velvety flowers of a rich vivid reddish purple. Blooms just after the late bearded Iris. Greatly admired in our garden this year. Fine as a cut flower	.75
82	<b>DRAKE</b> (Bliss, 1919). Resembling Pallida Dalmatica with well shaped flowers of palest Cambridge blue. A really fine variety, free flowering and a good grower	.35
74	<b>DR. BERNICE.</b> S. coppery bronze; F. velvety crimson. Vigorous and free flowering. 2 ft.	.35
85	<b>DREAM.</b> A soft clear pink toned Iris. Very free flowering and vigorous. 3 ft.	1.00
	<b>DRYADE</b> (Cayeux, 1924). S. metal blue; F. violet crimson, reticulated faun at the throat, late	10.00

See inside back cover for quantity offer

DUKE OF BEDFORD (Bliss, 1922). "The general effect in the border is that of a deep violet with a shade of red throughout, the standards being deep violet, the falls of a far deeper tone, almost black purple in certain lights with a reddish sheen under violet veins." One of the best of the famous Dominion race	15.00
DUKE OF YORK (Perry, 1923). A new Perry variety and considered one of his best. "Stout branching stems bearing many gigantic flowers of perfect shape and texture, well over 4 ft. high; S. 2 3/4 in. broad, soft mauve-blue faintly stained bronze; F. soft mauve-blue conspicuously lightened by a bold orange beard" -----	3.50
87 DUSK (Morr. 1921). Large flowers of individual form and exceptional substance. S. lavender; F. velvety maroon purple. Orange beard. Growth vigorous, to 4 ft.-----	4.00
DUSKY MAID (Bliss, 1919). S. pale buff; F. a deep mauve purple with pale broad margin. A distinct and striking variety, 2 1/2 ft. -----	1.00
ECKESACHS (G. & K. 1920). A large flowered bicolor of merit. S. light lavender violet; F. deep velvety violet. Growth vigorous -----	1.00
ECLARIEUR (Cayeux, 1923). A light toned variety of real merit. S. white shaded lilac; F. rosy violet suffused and richly edged clear lilac. Free flowering and vigorous-----	3.00
86 EDOUARD MICHEL (Verdier, 1904). A very fine variety which is much admired. The color is a distinct deep reddish petunia violet, the falls slightly deeper toned than the standards. An improvement over Caprice-----	.50
EGLAMOUR (Hort 1921). A very large and well formed purple bicolor of vigorous growth and with strong stiff stems. Considered one of the best varieties of this originator-----	5.00
E. H. JENKINS (Bliss, 1919). A free flowering variety of vigor with stout branching stems. S. pale steel blue-purple; F. of a deeper tone. Outstanding-----	1.00
78 ELDORADO (Vilm. 1910). A vigorous free flowering variety of blended tones. S. yellowish bronze shaded heliotrope; F. bright violet-purple with bronze yellow shading-----	.35
77 EMIR (Yeld, 1918). A tall variety allied to Neptune, but with darker falls and rich yellow reticulations over brown ground color -----	.75
75 EMPIRE (Sturt, 1918). S. and F. chrome yellow. A free and dependable bloomer, 30 in.-----	.50
80 FAIRY (Kenn. 1905). A dainty variety, white in effect, but with delicate blue tones in center of flower. Very good, tall and free flowering -----	.25

Plant shallow, just covering top of rhizome

<b>FEDORA</b> (Cayeux, 1923). A variegata type, of Iris King x Prosper Laugier parentage. S. old gold; F. rich reddish violet-purple broadly edged gold. Free flowering and vigorous-----	2.00
<b>FIRMAMENT</b> (Grochner 1920). A large flowered early variety of vigorous growth. Flowers two shades of light lavender blue. Blooms with Flavescens and Florentina-----	.50
<b>FLAMMENSCHWERT</b> (G. & K. 1920). The name means Flaming Sword. Claimed to be an improved Iris King. We would not compare the two. This Iris is more like Marsh Marigold or Maori Princess. S. bright yellow; F. velvety brown with yellow border. Vigorous and free-----	1.00
<b>70 FLAVESCENS.</b> The old, early, pale yellow-----	.25
<b>76 FLORENTINA.</b> The early May flowering white, flushed lavender -----	.25
<b>FRANKLIN BEYNON</b> (Perry, 1923). A dainty early free flowering variety. S. broad and incurved, light rose; F. soft rose with white and yellow beard-----	2.00
<b>FUERSTIN LONYAY</b> (G. & K. 1920). S. bright violet-rose; F. deeper tone, with white markings at base. A vigorous free flowering variety -----	1.00
<b>GEO. J. TRIBOLET</b> (Longfield 1926). A magnificent deep purple Iris with flowers of perfect form borne freely on well proportioned stems 40 inches tall. S. nigrosin-violet; F. velvety blackish red purple. Highly recommended-----	6.00
<b>GEORGE YELD</b> (Perry, 1923). One of the best of the new race of tall bicolors originated by Mr. Perry. S. bright apricot shaded rose; F. brilliant rose-crimson edged buff. Distinctive, free flowering and of vigorous growth-----	7.50
<b>GEORGIA</b> (Farr, 1920). A uniform soft shade of Cattleya rose with bright orange beard. Early, bright, free flowering and vigorous. Especially valuable as it is the earliest of the pinks. 2 ft.-----	1.00
<b>65 GERTRUDE</b> (Pet. 1907). We keep this variety because it is the best early one in its color. A blue-purple self. It was rated far too low -----	.25
<b>GLAMOUR</b> (Bliss, 1922). Not as large a flower as some others of the Dominion race, but of fine form. A finished Iris and one of the most free flowering of the race. S. broad, finely arched, heliotrope tinged pale ochre yellow and shot lilac; F. a pure rich red pansy violet. 3 ft.-----	15.00
<b>GLITTER</b> (Bliss, 1919). Distinct, early and free flowering. S. bright golden yellow; F. pale chestnut brown with soft yellow margin. 27 inches -----	1.00

Twelve plants for price of ten

GOLDEN GLORY (H. S. Jackson, No. 21). An afterglow x Shekinah seedling. Honorable mention by American Iris Society, Lafayette, Ind., June 4, 1926. A yellow self, stalk stiff, well branched, 36-40 inches high with 7-11 bloom buds. Standards broadly obovate, domed, wavy at margin and of great substance, pinard yellow deepening to lemon chrome at base. Falls well rounded, straight hanging with some tendency to be laterally reflexed when old, baryta yellow deepening to pinard yellow at base with indistinct buckthorn brown reticulation at haft. Beard light cadmium to cadmium yellow at base. Style branches lemon chrome. The general effect is a sturdy tall yellow of excellent form, deeper in color and superior to Shekinah with the foliage and vigor of Afterglow. Stock very limited-----	25.00
GOLD IMPERIAL (Sturt. 1924). A yellow self of unusually bright clear coloring. S. and F. empire to lemon chrome yellow. Beard orange -----	6.00
71 GOVERNOR HUGHES (Fryer, 1919). S. violet tinged with red; F. darker shade of same color, veined brown. Very heavy orange beard. Free flowering and excellent for landscaping-----	.25
GRAND FERRE (Cayeux, 1924). S. lavender washed buff; F. bright violet purple, reticulated white at base, edged deep buff. Beard orange -----	15.00
GRAPTA (Wlmsn, 1925). An Iris of distinct and effective coloring. S. yellowish or toast brown; F. deeper. Free flowering and vigorous -----	1.00
GREATER MAY QUEEN (Weed, 1923). A taller Queen of May. S. amparo purple; F. slightly more violet. 40 inches-----	.75
85 GREVIN (Vilm. 1920). An excellent variety with good sized flowers of great substance, deep red purple, flushed copper, 2 ft. -----	.75
85 HALO (Yeld, 1917). Flowers of good size, soft and delicate tones of lavender blue and Verbena violet, the falls slightly darker than the standards. We consider this equal if not superior to Lord of June-----	1.00
HARRIET PRESBY (Presby, 1922). A very tall light red violet, the haft finely reticulated orange apricot. Vigorous, to 4 ft. Very attractive -----	2.00
73 HER MAJESTY (Perry, 1903). The best of the older pinks. A really beautiful Iris that should be in every collection-----	.25
88 HERMIONE (Hort, 1920). A late flowering purple bicolor, of medium height. S. bright blue purple; F. very distinct rich reddish purple with orange beard. 3½ ft.-----	2.50
HEROCLES (Millet, 1905). A blend of blue and yellow, the blue predominating. 2 ft. -----	.50
HIPPOLYTA (Hort, 1921). A fine late pallida type, with well formed flowers of a pleasing shade of mauve. 3½ ft.-----	1.00

Plant in a sunny well drained location

<b>HUBERT</b> (Denis, 1922). S. an exquisite shade of Parma violet, shading to bronze at base; F. rich lobelia-blue veined maroon. Tall-----	1.00
<b>HUSSARD</b> (Vilm. 1924). An excellent deep toned blue self. Vigorous. Very scarce -----	3.00
<b>IDEAL</b> (Cayeux, 1923). S. clear blue; F. slightly deeper in tone. Very pure coloring-----	4.00
<b>IMPERATOR</b> (Cayeux, 1923). S. clear violet tinted buff; F. reddish violet, throat reticulated with red brown. A very beautiful variety that bloomed for the first time in our garden last year. We can recommend it as one of the best of the newer Cayeux varieties -----	3.00
<b>INCA</b> (Farr, 1922). S. clear deep saffrin yellow; F. velvety dark plum, edge and medial line of gold. A distinct and brilliant variety. 1½ ft.-----	1.00
<b>79 IRIS KING</b> (G. & K. 1907). A rich buff yellow and velvet garnet bicolor. We have seen no improvement on this old variety among the novelties -----	.35
<i>Iris orientalis</i> . A beardless species with purple flowers on straight stems, blooming at about the height of the foliage. A fine cut flower and excellent for landscaping-----	.25
<i>Iris pseudacorus</i> . The yellow swamp Iris of Europe. 3-4 ft. tall. May be planted where water stands. Fine along streams or at edge of pools or ponds-----	.25
<i>Iris tectorum</i> . This is sometimes called the Japanese Roof Iris because it is grown on the ridges of the thatched roofs in that country. It is, however, a native of China. The foliage is broad and light green, the flowers a deep lilac or blue purple and quite flat in outline. Well developed specimens are 6 in. broad. Said not to be hardy in some northern localities, but does well here -----	.25
<b>86 ISOLINE</b> (Vilm. 1904). A beautiful large flowered blend of silvery lilac and purplish old gold tints. One of the three finest of the older varieties-----	.50
<b>83 IVANHOE</b> (Millet, 1911). Nearly a pale bluish lavender self. The falls a tone deeper than the standards. An excellent clear toned flower and a very vigorous grower-----	.50
<b>JACQUELINE GUILLOT</b> (Cayeux, 1924). A pure, clear self of lavender-blue with white beard. Very free flowering-----	4.00
<b>80 JACQUESIANA</b> (Lemon, 1840). An excellent old variety with copper crimson standards and maroon falls. 3 ft.-----	.35
<b>70 JAMES BOYD</b> (Farr, 1915). S. domed, clear light blue; F. dark violet, tipped and edged lighter. 30 inches-----	.35
<b>JAPENESQUE</b> (Farr, 1922). A unique variety. The six petals, spreading horizontally in the form of a Japanese Iris, give the effect of having six falls and no standards. S. lavender violet, flecked violet; F. deep violet, edged lavender-----	.75

Three plants of one variety for price of 2½

JEAN CHEVREAU (Cayeux, 1923). S. light yellow shaded Isabelle; F. milk white, thinly spotted with violet, brown at the throat and margins. A good grower-----	4.00
78 JEANNE D'ARC (Verdier, 1907). White delicately frilled lilac. Very fine. 30 inches-----	.25
JENNETH DEAN (Sturt, 1920). "Deliciously fragrant blossoms of a soft iridescent lavender violet; very large with flaring falls, stalk low and widely branched, 3 ft."-----	4.00
JULIA MARLOWE (Shull, 1924). A stately flower with pink tones of Chinese violet and raisin purple. Stalk tall and well branched. 40 inches -----	7.50
81 JUNIATA (Farr, 1909). A very tall clear blue self. One of Farr's best -----	.35
KASTOR (G. & K. 1914). A light clear blue self, strong growing. 30 inches -----	.50
KATE HAYTOR REED (Perry, 1923). Large open flowers on strong branching stems. S. bright blue; F. a deeper shade -----	2.00
81 KATHRYN FRYER (Fryer 1917). S. clear straw-yellow, F. velvety maroon-red, veined white at the center and reticulated yellow at base; beard orange. A late flowering variety, fragrant and floriferous-----	1.00
78 KING GEO. V (Perry, 1911). A Cengialti seedling. S. purple violet; F. crimson purple with conspicuous white or orange beard. Very free flowering-----	.50
76 KNYSNA (Bliss, 1917). S. clear deep yellow; F. deep velvety brown. Free flowering and vigorous. 32 inches-----	.50
78 KOCHII. The old, early, dark blackish purple self-----	.25
85 LADY FOSTER (Foster, 1913). A large tall lavender bicolor on the order of Crusader. Growth slow-----	1.00
LADY JELLICOE (Perry, 1914). S. a beautiful shade of silver grey; F. madder crimson with brilliant orange beard-----	1.00
LANCELOT (Bliss, 1919). A tall vigorous pale rosy-mauve self with brilliant orange beard. An excellent variety-----	1.00
83 LA NEIGE (Verdier, 1912). A creamy white self with flaring falls. 2 ft. -----	.50
LAVENGRO (Bliss, 1920). S. dark coppery crimson; F. richest red maroon. An improvement on Red Cloud. 2 ft.-----	1.00
LEANDER (Bliss, 1920). A mauve self. Beard conspicuous, white, 30 inches -----	1.50
90 LENT A WILLIAMSON (Wlms. 1918). The most famous American variety. A large bicolor. S. erect lavender violet blended yellow; F. drooping velvety pansy violet. Very vigorous and free. 42 in. Substance exceptional. Plant this by itself against a background of shrubbery-----	.75

Cultivate shallow, roots are close to surface

LEONE TRENANCE (Bliss, 1922). S. pale lavender; F. slightly darker tone and much reticulated. Strong erect stems, 3 ft. Very free flowering and of rampant growth. An excellent variety for landscaping -----	.35
LEONATO (Hort, 1922). An exceedingly large flower of good form and substance. S. pale lavender passing to silvery heliotrope in certain lights; F. of slightly darker tone than the S. with dark reticulations on a white ground at the haft. Early and a strong grower; to 4 ft.-----	10.00
LEPINOUX (Millet, 1923). A Ricardi hybrid. S. aniline blue; F. deep purple flushed a purplish tone. Large flowers on very tall stems. 4½-5 ft.-----	3.00
91 LEVERRIER (Denis, 1917). One of the finest French introductions. S. a beautiful shade of mauve; F. rich pansy-violet. Large flowers on tall branching stems. A valuable variety in the garden on account of the clear tone of the falls. An excellent show variety. Fragrant. Vigorous, to 42 in.-----	2.50
82 LOHENGRIN (G. & K. 1910). Large self of a uniform shade of light Cattleya rose-----	.25
91 LORD OF JUNE (Yeld, 1911). A very large, light bicolor. S. chicory blue; F. lavender violet, drooping. This Iris is universally admired. A fine show flower. Fragrant. Vigorous-----	1.00
LORD LAMBOURNE (Perry 1923). A magnificent Iris with large well shaped flowers produced freely on tall branching stems. S. a delightful shade of rose-faun, suffused with pale bronze; F. a rich madder crimson, reticulated white at the base and illuminated with a bright yellow beard. -----	6.00
79 LORELEY (G. & K. 1909). A light yellow and purple bicolor. F. bordered yellow. The most free flowering of any of the older sorts. Excellent for landscaping-----	.25
LURLINE (Bliss, 1919). Early. S. pale lilac mauve; F. light reddish mauve. Vigorous and free flowering. 40 in.-----	1.00
79 MADY CARRIERE (Millet). S. pale plumbago blue; F. ageratum blue shading to rich yellow at the base. A brighter Afterglow and by some considered superior -----	.50
78 MAGNATE (Sturt. 1918). A large flower of deep red purple tones, stalk widely branched. 28 in.-----	.50
91 MAGNIFICA (Vilm. 1920). A very large bicolor. S. flushed with pale hortense violet; F. Phlox purple. A great show flower. Vigorous, to 4 ft.-----	1.00
81 MA MIE (Cayeux, 1906). A large plicata, white, penciled light violet. An improved Madam Chereau -----	.35
MARION CRAN (Perry, 1921). Not the famous Mrs. Marion Cran. A dull Mathews purple self, free and vigorous-----	.50
MARIPOSA (Mohr, 1923). Pale porcelain, the falls variably flecked with red purple. Medium sized flowers well poised on fine branching stems. Vigorous, 3 ft.-----	1.00

87	<b>MARSH MARIGOLD</b> (Bliss, 1919). S. pale golden yellow; F. deep purple brown with bright yellow margin. We consider this the best of its type. Free flowering and vigorous-----	1.00
78	<b>MARY GARDEN</b> (Farr, 1913). A plicata blend. White, heavily sanded, light purple drab. Very vigorous and free flowering. 30 in. -----	.25
	<b>MARY GIBSON</b> (Perry, 1923). Considered one of the very best of the Perry introductions. A distinct and beautiful variety. S. a delicate shade of light bronze strongly overlaid old rose; F. old rose suffused bronze, conspicuous yellow base. Bold orange beard. 3½ ft. Stock, scarce-----	7.50
	<b>MAUVINE</b> (Dean 1919). S. mauve, F. a shade darker of the same color. Handsome, tall and free flowering-----	.35
78	<b>MARY WILLIAMSON</b> (Wilms. 1921). S. white; F. flaring, purple with very wide border of white. A very striking Iris and absolutely distinct. Very free flowering-----	1.00
85	<b>MEDRANO</b> (Vilm. 1920). S. reddish copper; F. slightly darker crimson purple, flecked with buff and lavender. A distinct and much admired variety-----	1.25
	<b>MENETRIER</b> (Denis, 1921). A large flowered variety of Ricardi origin. S. yellow shaded terra cotta; F. bronze-yellow, throat yellow striped maroon -----	2.00
	<b>MERCUTIO</b> (Hort, 1920). An early, pale purple self. Free flowering and vigorous. 2 ft. -----	.50
83	<b>MERLIN</b> (Sturt. 1918). S. cupped, lavender violet; F. drooping, Rood's violet. Vigorous -----	.50
	<b>MESTOR</b> (Perry, 1923). One of Perry's finest introductions. Very large flowers with S. broad and uncurved, light violet blue; F. broad, rich violet purple overlaid black-----	5.00
	<b>MIDWEST</b> (Sass, 1922). A fine ruffled plicata. S. flushed and dotted Mathew's purple; F. white heavily bordered the same color. A very distinct variety with low well branched stems and of vigorous growth-----	1.00
	<b>MILDRED PRESBY</b> (Farr, 1923). S. white flushed cream; F. rich, dark, velvety pansy violet with narrow edge of lavender white. A very beautiful variety that stood out among the newer things in our garden this year. Highly recommended -----	2.50
78	<b>MINNEHAHA</b> (Farr, 1913). S. creamy white, shaded yellow; F. cream white, heavily reticulated maroon. A distinct variety. 2 ft. -----	.50
	<b>MIRANDA</b> (Hort, 1919). Perhaps the best variety of its color. Free flowering, vigorous and tall. It stood out as a very distinctive color tone in our gardens this year. A clear deep violet blue. 3½ ft. -----	.50
	<b>MISS POMEROY</b> (Perry, 1923). S. rosy mauve; F. purplish crimson, with brown reticulations at haft-----	1.00

MISS ROWE (Perry, 1911). Stout branching stems bearing numerous medium sized flowers. S. lavender blue; F. reddish purple	1.00
75 MITHRAS (G. & K. 1910). S. brilliant canary yellow; F. rich crimson reticulated white, with conspicuous yellow margin. A fine variety. Superior to Loreley	.35
87 Mlle. SCHWARTZ (Denis, 1916). A pale mauve self. Very large and of fine form. One of the most outstanding varieties and a great favorite	1.00
Mme. ABEL CHATENAY (Cayeux, 1924). A new Iris of distinct and beautiful coloring. S. rosy lilac; F. rosy heliotrope reticulated fawn and white at haft. Beard yellow	7.50
74 Mme. CHEREAU (Lemon, 1844). An old favorite. White with lavender violet penciling on S. and F. Growth vigorous, 3 ft.	.25
84 Mme. CHERI (Sturt. 1918). Ageratum violet washed with pink and warmed by a yellow under tone. The F. slightly darker than S. An exquisite blend, tall and vigorous	1.00
85 Mme. CHOBAUT (Denis, 1916). A charming small plicata, the yellowish ground flushed apricot and amber. Very daintily colored and one of the most popular varieties	.50
86 Mme. DURRAND (Denis, 1912). By some authorities considered one of the most beautiful of all Iris. S. domed, old gold; F. with ground color of old gold, flushed with bluish wine bronze. A slow grower which needs a protected location, but is well worth special care	3.00
78 Mme. DE SEVIGNE (Denis, 1916). A fine large plicata with prominent violet purple markings on a white ground. Very vigorous and free	.35
Mme. VERNOUX (Millet, 1921). A Ricardi hybrid. Early and vigorous. S. aniline blue; F. velvety purplish violet shaded maroon on the white throat	1.00
90 MOA (Bliss, 1919). One of the tallest and most striking of Bliss' Dominion seedlings. Large flowers on well branched stems. S. pure violet; F. deep violet purple or pansy violet. An excellent seed parent. 40 in.	20.00
85 MOLIERE (Vilm. 1920). S. violet blue; F. deep rich velvety violet, veined brown. Beard yellow. Flower darker, but as good as Magnifica though not so tall. 30 in.	.75
84 MONSIGNOR (Vilm. 1907). S. rich, satiny violet; F. mauve, heavily veined and centered velvety Cotinga purple. Very free flowering and vigorous, to 30 in.	.25
83 MONTEZUMA (Farr, 1909). S. deep golden yellow, minutely dotted brown; F. yellow and white, veined purple and dotted brown. 18 inches	.50

75	MORNING SPLENDOR (Shull, 1923). Considered by some, the finest American introduction. When planted so that the low lying morning sun may be seen through it, the appropriateness of the name becomes evident. S. petunia violet; F. raisin purple. Strong growing and absolutely hardy-----	5.00
76	MOTHER OF PEARL (Sturt. 1921). This much advertised Iris is really very fine. It should rate 90 and is considered by some to excel Mlle. Schwartz. Certainly a better grower. A luminous pearl self of good size-----	1.00
82	MOUNT PENN (Farr, 1909). S. lavender rose; F. crimson lilac; deep orange beard. Vigorous, to 30 in.-----	.75
76	MRS. ALAN GRAY (Foster, 1909). A delicate, pale rose-mauve self. Vigorous, free. Sometimes blooms twice in a season. To 30 in.-----	.25
78	MRS. COWLEY (Bliss, 1920). S. russet vinaceous, flushed dahlia carmine; F. velvety, violet carmine with light border-----	.50
	MRS. W. CUTHBERTSON (Perry, 1923). An exceedingly handsome iris of noble proportions, stem stout and branching, over 4 ft. high. S. soft rose overlaid apricot, faintly lined old rose; F. bright rosy crimson, edged silver-----	7.50
71	MRS. FRYER (Fryer, 1917). S. white, shaded lavender; F. purple-crimson bordered a lighter shade; white veins from center to base. Vigorous, free -----	.50
	MRS. HETTY MATSON (Perry, 1923). Large globular flowers, similar to Lord Lambourne, but of different coloring. S. purple faun, shot with bronze; F. broad, rich crimson, purple; yellow beard -----	3.00
	MRS. TINLEY (Bliss, 1920). An early large lavender self with conspicuous orange tipped beard. Very free flowering	.50
	MRS. WALTER BREWSTER (Vilm. 1922). A good light toned semi-bicolor. S. lavender blue; F. aniline blue. Vigorous and free -----	.75
74	MYTH (Sturt. 1918). Large, verbena to light hyssop violet self. Growth vigorous, 2 ft. -----	1.00
82	NANCY ORNE (Sturt. 1921). "Of the same type and crushed raspberry color as Mme. Cheri, but more of a self and a pinker tone, the growth and branching even finer." 4 ft.	.75
74	NAUSHON (Sturt. 1920). Mauve and pansy violet, very free flowering. 30 in.-----	.35
81	NEPTUNE (Yeld, 1916). A tall purple bicolor; S. pale lavender blue; F. deeper tone -----	.50
	NIMBUS (Shull, 1923). S. light lobelia violet; F. Cotinga purple. A very free flowering novelty that we like very much in spite of the somewhat somber coloring. 3½ ft. -----	3.00

Clumps should be divided every 4 - 6 years

80	<b>NINE WELLS</b> (Foster, 1909). S. light violet; F. deep purple with white ground at haft, somewhat like Perfection, but taller and with larger flowers. 4 ft.	.50
76	<b>NUEE D'ORAGE</b> (Verdier, 1905). S. pallid, purple drab to deep lavender; F. Bradley's violet. Vigorous and free	.25
79	<b>OCHRACEA</b> (Denis, 1919). S. yellowish buff; F. same tone, strongly flushed mauve. An unusual and striking blend that attracts much attention. Free flowering and vigorous	1.50
78	<b>ODORATISSIMA</b> . An old pallida type that is still good. Very free flowering and sweet scented. A deep lavender self.	.50
	<b>OLIVER PERTHUIS</b> (Millet, 1921). A large flowered plant with stems over 4½ ft. S. blue, shaded mauve; F. bright purplish violet. Very fine	1.00
	<b>OLYMPUS</b> (Perry, 1923). A variety with large heavily built flowers, which are produced freely on stout branching stems; S. broad, incurved, rose overlaid soft bronze; massive. F. over 2 in. broad, madder crimson, heavily reticulated white at base	5.00
87	<b>OPERA</b> (Vilm. 1916). A rich violet-red bicolor. S. bright rich pansy violet; F. rich velvety violet purple. Vigorous and free. Very striking and much admired	.50
79	<b>OPORTO</b> (Yeld, 1911). Standard and falls dark violet. Flowers not large, but finished. Similar in color to Parc d' Neuilly, but earlier. 30 in.	.35
78	<b>ORIFLAMME</b> (Vilm. 1904). Very large flowers. S. lavender blue; F. violet purple, 30 in.	.50
	<b>PALADIN</b> (Bliss, 1921). S. clear violet blue; F. deep rich violet purple. Vigorous, 34 in.	2.00
	<b>PALLIDA DALMATICA</b> . See <b>PRINCESS BEATRICE</b> .	
81	<b>PARC DE NEUILLY</b> (Verdier, 1910). A rich late plum purple self which we can recommend. Vigorous, 3 ft.	.35
	<b>PARAGON</b> (Wallace, 1920). Early, S. pale lavender blue; F. slightly deeper shade, flushed rose purple. Fragrant	1.00
79	<b>PARISIANA</b> (Vilm. 1911). S. white dotted and blotched lilac purple; F. white frilled lilac at margin. 30 in.	.35
	<b>PATRICIAN</b> (Bliss, 1921). S. broad, light violet blue; F. rich, deep velvety purple. Orange beard	2.00
75	<b>PAULINE</b> (Farr, 1913). A fine large flower of pansy violet on 36 inch stems; prominent orange beard	.35
	<b>PEAU ROUGE</b> (Cayeux, 1923). S. coppery red; F. violet carmine, reticulated yellow at base. One of the good new Cayeux varieties and a near approach to a red. Vigorous and free	3.00
78	<b>PERFECTION</b> (Barr, 1880). S. light blue; F. dark, velvety violet black. Beard orange	.25

89	PHYLLIS BLISS (Bliss, 1919). A uniform, pale rosy lavender. Very delicate coloring -----	.75
	PIONEER (Bliss, 1924). One of the most beautiful and distinct of the newer Iris. S. large and incurved, bright reddish purple; F. broad, a deep glowing red purple; beard orange. Vigorous and strong in growth with free branching habit-----	7.50
	POLLUX (G. & K. 1914). A bright blue self with flaring falls; stiff stems. Little known, but good. 30 in.-----	.75
80	POWHATAN (Farr, 1913). S. light bishop violet with deeper border; F. deep purple shaded crimson. Vigorous, 3 ft.-----	.25
95	PRINCESS BEATRICE (Barr). This is the true variety and one of the finest Iris in cultivation. We carry this variety rather than Pallida Dalmatica. It is the best of the varieties which have gone under that name. S. lavender; F. slightly deeper tone with iridescent sheen -----	.50
	PRINCESS OSRA (Bliss, 1922). A very large clear plicata with tall stems. Clear white, the S. broadly, the F. more narrowly margined with spots and some veining of soft wistaria violet and bluish lavender. One of the best new plicatas-----	3.00
72	PRINCESS VICTORIA LOUISE (G. & K. 1910). S. sulphur yellow; F. rich plum, bordered cream-----	.25
	PROF. A. SEELIGER (Koehler, 1923). A tall grower of distinct deep wine red color. 3½ ft.-----	1.50
	PROSPERITY (Sturt. 1924). A large bicolor with flaring falls; lilac and hyacinth violet. Vigorous and free, to 4 ft.-----	2.00
83	PROSPER LAUGIER (Verdier, 1914). S. an iridescent sorghum brown; F. velvety, bordeaux to Indian purple-----	.35
	PROSPERO (Yeld, 1920). A large blended violet bicolor with smoothly rounded falls. In a class with Asia, which it resembles in shape. We would rate this Iris 90 or over. S. pale lavender, flushed yellow at base; F. deep red purple with light shading at margin, to 4 ft.-----	1.00
84	QUAKER LADY (Farr, 1909). S. smoky lavender shaded yellow; F. ageratum-blue and old gold. Very attractive, and finished. A prim flower very appropriately named. Vigorous, to 3 ft. -----	.35
75	QUEEN ALEXANDRA (Barr). S. purplish lilac; F. lilac, reticulated bronze at base. An old variety much admired-----	.25
91	QUEEN CATERINA (Sturt. 1918). A large iridescent pale lavender violet self. A great favorite and one of the finest American introductions. Vigorous and free, to 3½ ft.-----	1.00
74	QUEEN OF MAY (Salter, 1859). An old standard; soft rosy-violet, almost pink -----	.25
81	RAFFET (Vilm. 1920). A uniform dark blue with falls striped at base with white. Beard yellow. 30 in.-----	.75

RAMONA (Mohr, 1924). A new blend of colors—petunia-violet, flushed cinnamon brown, lightened by an orange beard. Excellent form and substance. A very distinct Iris of vigorous growth -----	1.50
78 RED CLOUD (Farr, 1913). S. rosy bronze; F. velvety maroon reticulated yellow. 24 in. Very rich coloring-----	.35
RED RIDING HOOD (Koehler, 1922). A near approach to red. S. reddish lavender; F. purplish-red with mottlings of brown near base. 32 in. -----	.50
REGAN (Hort, 1920). A fine and distinct dark purple early flowering bicolor with exceptionally long falls heavily reticulated brown on a white ground-----	.75
RENE CAYEUX (Cayeux, 1924). A very fine new Amoena type. S. white shaded lilac; F. crimson reddish violet reticulated white at the throat. One of the most striking of the new Cayeux seedlings. Stock limited-----	12.00
RHEINGAUPERLE (G. & K. 1915). A uniform bright rose somewhat similar to Wild Rose, the falls somewhat brighter than the standards. A very attractive variety and the best of the newer things from this originator. Stock limited-----	2.00
84 RHEIN NIXE (G. & K. 1910). S. white; F. violet blue with white margin. The finest of the older Amoenas and a great favorite. Over 3 ft. -----	.35
RHEINTRAUBE (G. & K. 1917). S. clear light blue; F. rich dark purple. Stout stems over 3 ft. This variety may prove an improved Perfection. We prefer it to Nine Wells, though not as large or as tall -----	1.00
ROBERT W. WALLACE (Perry, 1923). A magnified dark Pallida. S. deep rich violet; F. rich deep purple black, with orange beard. A vigorous variety with low and well branched stems, 36 in. height. A greatly improved Archeveque	5.00
ROBIN (Bliss, 1919). S. bright rosy mauve to heliotrope; F. bright Bishop's violet. 30 in.-----	1.00
83 RODNEY (Bliss, 1919). A free flowering Dauphin's violet pallida, smooth textured and finely shaped. Vigorous, to 39 in.	.50
86 ROMANY (Bliss, 1919). S. pale dusky yellow; F. bright reddish brown. Very rich -----	.75
80 ROMEO (Millet, 1912). S. citron yellow; F. purple, lilac at center. Unique coloring -----	.50
82 ROSEWAY (Bliss, 1919). Phlox purple, falls duller. Beard orange. Very rich coloring. Vigorous, to 42 in. An excellent landscape variety. Early -----	.50
ROTORUA (Bliss, 1921). An aniline lilac self, falls faintly veined mauve. 3 ft. -----	2.50

80	RUBYD (Ruby, Dykes, 1922). A rich deep reddish violet purple, the F. slightly deeper in tone than the S. Beard brilliant aniline blue, tipped ochre yellow. Good for massing. Vigorous and free flowering -----	1.00
	RUBY PERRY (Perry, 1921). A beautiful dark rose pallida, stout branching stems, large well shaped flowers of an almost uniform shade of dark rose. Very free and nearly 4 ft. tall-----	2.00
	RUBY QUEEN (Weed, 1923). S. light Matthew's purple; F. Rood's violet, lighter at edge. A distinct ruby toned Iris-----	.75
	RUGAJO (Weed, 1923). S. pale flesh pink at center to perilla purple at edge; F. Rood's violet, lighter at edge. 34 in. Very distinct coloring -----	1.00
	SAFRANO (Dykes, 1922). A late flowering yellow of vigorous growth. The flowers are of medium size, clear straw yellow, slightly suffused deep sunflower yellow, the flaring falls a little paler than the standards-----	1.50
	SALONIQUE (Cayeux, 1923). S. creamy white; F. violet purple, throat veined white. Strong growing and free flowering. A distinct variety of unusual color-----	1.50
83	SARPEDON (Yeld, 1914). A clear toned bicolor. S. soft bluish violet; F. hyacinth violet. Large flowers on slender stems. 3 ft. -----	.50
83	SEMINOLE (Farr, 1920). S. dark violet rose; F. rich velvety crimson, brilliant orange beard. We consider this the finest of the red toned Iris we have seen. Rich in color and a wonderful effect in mass. Over 2 ft. -----	.60
87	SHEKINAH (Sturt, 1918). One of the finest of the yellow self colored Iris. Flowers on 3 ft. stems, pale lemon yellow deepening at center. Highly recommended -----	1.00
81	SHERBERT (Sturt, 1918). S. ecru-drab, deepening through cinnamon to purplish vinaceous; F. dahlia purple, lighter at edges. Very effective. Stalks well branched. 4 ft.-----	.75
76	SHERWIN WRIGHT (Koh. 1915). A bright golden yellow self. Vigorous, 24 in. -----	.25
	SILVER MIST (Dykes, 1921). An exceedingly free flowering and reliable variety of medium height with flowers of a uniform shade of pale silvery blue-----	2.00
	SILVER RIBBON (Longfield, 1926). Heavy textured blooms on stout stems 30 in. high. Flowers self colored a deep pink, with a pale band down the center of each fall. Prominent yellow beard. A very beautiful variety-----	2.00
84	SINDJKHA (Sturt, 1918). A combination of subdued lavender and buff. Very attractive and of high quality. 4 ft.-----	.75
	SIRDAR (Perry, 1923). Large flowers on stout branching stems, 3½ ft. high. S. bright blue faintly edged silver; F. crimson purple shading to dark mauve-----	1.00

93	<b>SOUV. DE MME. GAUDICHAU</b> (Millet, 1914). A very large rich velvety black-violet bicolor. One of the finest Iris in cultivation. Over 3 ft. -----	1.50
81	<b>STAMBOUL</b> (Foster, 1916). S. light blue; F. rich violet blue. Vigorous and free flowering. 3 ft.-----	1.00
	<b>STEEPWAY</b> (Scott, 1922). A smooth blend of satiny texture. S. dark vinaceous; F. auricula purple, orange beard-----	1.00
	<b>SUDAN</b> (Bliss, 1921). S. arching, bronze yellow; F. drooping, deep carmine-violet. 2 ft. -----	1.00
	<b>SUSAN BLISS</b> (Bliss, 1922). The tallest rose-pink Iris. We consider this one of the outstanding varieties of our collection and much superior to Dream. The color is a slight graduation of tone between Liserion purple and rose purple-----	2.50
	<b>SUSANNE AUTISSIER</b> (Denis, 1923). S. blue; F. velvety purplish violet striped maroon on a white throat-----	1.00
	<b>SUZON</b> (Millet, 1921). S. violet strongly lighted with a rose sheen; F. reddish purple plum. Late -----	3.00
78	<b>SWATARA</b> (Farr, 1918). S. lobelia blue, suffused bronze-yellow at base; F. bright violet. Beard yellow. One of the best of the older Farr varieties. 3 ft. -----	.25
	<b>SWAZII</b> (Bliss, 1922). The nearest to Dominion in color of any of the seedlings of that famous Iris. The falls are not so broad and perhaps not quite of the same intensity of color, but this is more than compensated by the height and good stalk. Over 3 ft. -----	15.00
78	<b>SWEET LAVENDER</b> (Bliss, 1919). A bicolor of pleasing contrast. S. lavender violet; F. Chinese violet. Vigorous-----	1.25
75	<b>SYPHAX</b> (Bliss, 1917). S. mauve; F. velvety raisin purple flushed ochre at haft. Vigorous, 30 in. -----	.50
85	<b>TARTARIN</b> (Bliss, 1919). A very large, light lavender to dull bluish violet self. To 3 ft. -----	1.00
	<b>TENEBRAE</b> (Bliss, 1922). A Dominion seedling. S. Manganese violet tinged deeper; F. velvety blackish purple. This is the best bargain in the catalog. This variety is the most vigorous grower of any of the race and was much admired in our garden this year -----	4.00
	<b>TERIAS</b> (Longfield 1925). Medium sized flowers of deep coppery pink carried in profusion on three foot stems. Very distinct and good - -----	1.00
	<b>THECLA</b> (Longfield 1925). A vigorous Iris bearing its beautiful flowers in great profusion. S. bright clear mauve; the spreading falls purple -----	.50
68	<b>THORBECKE</b> . S. clear white without blotching; F. deep rich velvety purple. One of the older varieties that was much underrated. A free bloomer and one of the most attractive of the older sorts -----	.35

TITAN (Bliss, 1919). The largest flowered variety of the Dominion race. S. arching three inches broad, of light violet blue; F. broad and spreading, violet purple, deeper at center and with conspicuous reticulations of white at haft. Very strong and vigorous. 3 ft. -----	5.00
80 TOM TIT (Bliss, 1919). A self between mulberry purple and dark violet. Short, but very free. 18 in. Fine for massing--	.50
TRIANON (Vilm. 1921). A pale, pinkish buff self. F. flushed purplish lilac. Distinct. Vigorous, 30 in. -----	.50
82 TRISTRAM (Bliss, 1919). A white and purple bicolor. S. white tinted lavender; F. velvety, blackish purple, heavily veined white at base -----	.75
TROADES (Perry, 1923). "Extremely pretty medium-sized flowers; S. old rose overlaid apricot; F. bright rosy crimson with conspicuous white lined base." Introducer's description--	4.00
81 TROJANA. S. light lavender violet; F. amethyst violet, veined darker. Growth moderate, over 3 ft. Parent of many fine Iris -----	.35
TROPIC SEAS (Shull, 1924). "A sister plant to Morning Splendor and Julia Marlowe, representing the blue extreme, as Morning Splendor represents the red extreme of this family. S. Dauphin's violet; F. velvety mulberry purple to Hematoxylon violet, giving a very deep blue purple general effect and conspicuously lighted up by the bright golden beard. A large flower on stems 45-50 in. high and a splendid grower. Fragrant." Introducer's description -----	7.50
84 TROOST (Denis, 1908). In effect a self with veined falls. Light phlox purple. F. paler veined violet. A deeper toned Her Majesty -----	.50
TRUE CHARM (Sturt. 1920). A delightful as well as an individual form of flower and style of growth. Flowers white with margins delicately etched with blue lavender. One of the better new plicatas. Height, 40 in. -----	1.50
TURCO (Vilm. 1921). S. purplish lilac; F. lobelia violet, flowers buff at center. A very pretty Iris of unusual color tones and of vigorous growth -----	.75
TUSCANY (Foster, 1920). A Trojana seedling with handsome showy flowers. S. bright blue; F. very long deep purple. 3 ft. -----	5.00
UTE CHIEF (Farr, 1920). Almost identical with Alcazar, but broader at haft and perhaps a little larger. An excellent seed parent -----	.50
85 VALERY MAYET (Denis, 1912). S. coppery rose; F. deep red brown. Medium sized flowers, but an unusual and attractive color combination -----	1.00

See quantity offer on inside back cover

86	VELOUTE (Vilm. 1924). Best described as an improvement on Monsignor. Of the same coloring, but without the undesirable veining on the falls of that variety. A clear toned purple bicolor of real merit -----	2.00
87	VESPER GOLD (Longfield, 1927). We are very glad to be able to offer this distinct new variety to our customers. It was awarded an Honorable Mention by the American Iris Society at Lafayette in 1926 and is well worth this distinction. "Height, 40 in., stalk high but well branched, 5-9 flowers. Flower medium size, 3½ in. high and 5 in. wide. S. arching cupped, obovate, Baryta yellow, shading to pale empire at the margins and deep empire at the base, the whole suffused with violaceous reflections. F. flaring, wedge shaped, same color as standards, darker at the haft with golden and maroon veining, beard bright orange." Introducer's description. We consider this to be an Iris with a bright future-----	10.00
80	VIOLACEA GRANDIFLORA. A large violet self of smooth glossy texture. Very vigorous and free flowering and an excellent landscape variety -----	.25
	VIOLETTA (Dykes, 1921). An exceedingly free flowered variety of great beauty. S. a clear rich blue slightly tinted mauve; F. broad and rounded. Pure violet blue with prominent yellow beard. Strong grower and freeflowering-----	.50
81	VIRGINIA MOORE (Shull, 1921). A very good late tall yellow self. 32 in. -----	.50
	WHITE QUEEN (Geylenkek, 1918). Snow white with beard and throat greenish white. Very free flowering and vigorous. Will make a fine landscape variety -----	.75
81	WILD ROSE (Sturt, 1921). A very attractive pink. "In some lights almost the exact tone of the Prairie Rose, but with a silvery finish of unusual smoothness and fine texture" -----	3.00
83	W. J. FRYER (Farr, 1917). S. dull gold; F. deep red purple, reticulated in upper half and with yellow border. Free flowering and vigorous -----	.50
72	WYOMISSING (Farr, 1909). Small flowers of cream pink. Valuable in mass -----	.25
	YOEMAN (Bliss, 1912). Rich blue toned flowers of large size. S. clear light bluish violet; F. rich deep violet purple. Very free flowering. 30 in. -----	5.00
	YVONNE PELLETIER (Millet, 1916). Very tall and strong growing. A pale lavender blue with the F. slightly deeper tone than S. -----	.50
	ZOUAVE (Vilm, 1922). S. white suffused with lobelia blue; F. white heavily spotted and reticulated with violet at margin -----	.50
75	ZUA (Crawford, 1914). White self, slightly tinged lilac, crimped and crinkled like crepe paper. Absolutely different and in a class by itself. 18 in.-----	.50
85	ZWANENBURG (Denis, 1909). An Iris of peculiar and distinct coloring. S. dull lavender gray; F. bronzy yellow flushed maroon. Early and very free blooming. Rhizomes small-----	.50

Use bone meal or potash; beware of nitrogen

## ADDITIONAL LIST OF NOVELTIES

It is not feasible to catalog our entire collection of 550 varieties. We prefer not to make the catalog any larger at present and many of the newer varieties are available only in small amounts. We know, however, that many specialists will be looking for varieties not in the descriptive part. On this account the following list has been prepared, giving some of the novelties of which we can spare a few divisions, together with some standard varieties of which we have only a small quantity. Stock of all these is limited and orders should be placed early.

Achates (Perry, 1923)-----	\$1.00	J. J. Dean (Dean, 1922)-----	1.00
Aksarben (Sass, 1923)-----	2.00	Jubilee (Sass., 1924)-----	5.00
Albatross (Perry, 1923)-----	1.00	Lambrus (Perry, 1923)-----	1.00
Anna Farr (Farr, 1913)-----	1.00	Majestic (Bliss, 1920)-----	10.00
Athene (Sturt., 1920)-----	1.00	Maori Princess (Shull, 1923)-----	3.00
Aurelle (Denis, 1924)-----	2.00	Marsouin (Vilm., 1924)-----	4.00
Aurora (Yeld, 1909)-----	1.00	Mary Orth (Farr, 1920)-----	1.00
Autumn King (Sass., 1925)-----	4.00	Megas (Denis, 1922)-----	3.00
Azulado (Mohr, 1924)-----	5.00	Melpomene (Perry, 1924)-----	2.50
Balboa (Mohr, 1923)-----	2.50	Milky Way (Sturt., 1922)-----	2.00
Benoni (Perry, 1921)-----	2.00	Mme. Boullet (Denis, 1919)-----	1.00
Conopus (Bliss, 1919)-----	3.50	Mrs. Viesseux (Perry, 1923)-----	3.00
Catalosa (Farr, 1923)-----	2.00	Palemon (Perry, 1923)-----	2.50
Chalice (Sturt., 1924)-----	5.00	Perladonna (Perry, 1923)-----	2.50
Citronella (Bliss, 1922)-----	5.00	Quinda (Perry, 1923)-----	1.00
Commodore (Bliss, 1921)-----	2.00	Rajput (Sturt., 1922)-----	4.00
Curlesque (Weed, 1925)-----	5.00	Rameldo (Mohr, 1925)-----	2.00
Dionyza (Hort, 1923)-----	17.50	Reverie (Sturt., 1920)-----	8.00
Dreamlight (Sturt., 1923)-----	1.00	Rita (Mohr, 1924)-----	1.00
Esplendido (Mohr, 1924)-----	3.00	Romola (Bliss, 1920)-----	20.00
Feronia (Perry, 1923)-----	3.00	Sapphid (Dykes, 1922)-----	2.00
Gaviota (Mohr, 1924)-----	1.50	Simone Waissiere (Mil., 1922)-----	3.00
Glowing Embers (Sturt., 1923)-----	7.00	Sirdar (Perry, 1923)-----	1.00
Hakador (Perry, 1923)-----	1.00	Soledad (Mohr, 1924)-----	1.00
Harpalion (Perry, 1923)-----	2.00	Titus (Perry, 1921)-----	1.50
Helene Koehler (Koeh., 1924)-----	2.00	Undine (Koehler, 1922)-----	1.00
Helio (Perry, 1923)-----	2.00	Warrior (Sturt., 1922)-----	2.00
Hemodus (Perry, 1923)-----	1.00	Western Dream (Weed, 1923)-----	1.00
Hesperia (Wilms., 1926)-----	2.50	Yellow Rail (Longfield, 1927)-----	1.00
Jacinto (Berry, 1924)-----	5.00	Zila (Perry, 1923)-----	2.00

See Quantity Offer on inside back cover.

## COLLECTIONS AT REDUCED PRICES

Order by Letter. Prepaid Delivery. Cash with order. No substitutions. Collections delivered about July 20, August 10 and September 1 and 15. Specify which date desired.

Four of Any Collection (except KK to MM), for three times the price of one, to one address.

We reserve the right to substitute varieties of equal or greater value in case we run short of the variety listed.

## SPECIAL QUANTITY OFFER

Single plants of any variety cannot be dug for less than \$0.25 each except at a loss. When, however, a number are dug at one time and the quantity of available stock is sufficient we can make lower prices. In order to avoid confusion the following list has been prepared on which we can offer special prices as indicated by the table below.

Please note that these prices apply only on those varieties listed on this page. Stock of other varieties is available only at the dozen rate, 12 for the price of 10, 6 for the price of 5 and 3 for the price of 2½.

Varieties priced at	\$0.25	\$0.35	\$0.50	\$0.75
3 or more of a kind at	.20	.25	.40	.65

**Note:** Those varieties marked \* are available in considerable quantity and are offered for landscaping purposes at \$8.50 or \$12.50 depending on whether listed at \$0.25 or \$0.35 each. This price does not include carriage. They will be sent express collect.

**Seedlings:** Do not overlook our offer of mixed blooming size seedlings at \$5.00 per hundred. See page 8. These will make an excellent mixed landscape planting.

**Landscape Collection:** We can furnish a limited number of sets of 500 plants in 20 varieties, 25 plants of each (our selection, named and labeled) for \$37.50 F. O. B. Lafayette. These collections would prove valuable to florists for cut flowers.

Join the American Iris Society
